

GDPR Contact Manager Lite

Based on **GDPR Contact Manager**, from SP Data Services, **GDPR Contact Manager Lite** allows for the tracking of consent and removal of personal information in cloud based CRMs.

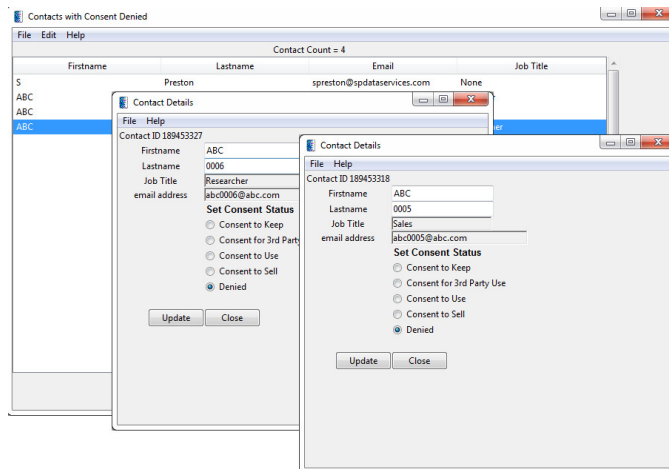

GDPR Contact Manager Lite opens with a dashboard showing the current consent status for all contacts, in pie chart form.

Lists of contacts are displayed based on consent state. Consent state is determined by user defined tags in your CRM application.

Detail screens allow for the management of consent and the anonymising of contacts.

Multiple types of consent approval can be set in your CRM and maintained by **GDPR Contact Manager Lite**

Drilling down on the dashboard lists all contacts for the selected consent state.

Results are presented in a scrollable and sortable list.

Multiple results lists can be displayed and multiple contacts can be maintained from the lists.

Contact detail screens allow for the update of contact names and the setting of consent.

GDPR Contact Manager Lite Key Features

- Intuitive dashboard
- Integration with your cloud based CRM
- Recording of multiple types of Consent Approval, as well as Consent Denial
- Anonymise contacts
